## SMS Text Messaging Service

The Practice now has the capability to send text messages direct to your mobile telephone. This service covers:

Appointment reminders

**and**

Campaign messages, e.g. flu vaccination reminder

To use this service the Practice needs to have an up to date mobile telephone number. When you contact the surgery a receptionist will ask you for this information.

If you **do not** wish to receive text messages from the Practice please advise a member of staff who will arrange for you to be opted out the system.
